Subject: RE: follow-up to PFAS meeting - results sharing with MD

Hi Shamus

I am not sure about "New testing of empty marketplace containers" – Do you mean the ones we bought for the leaching study? If yes, we are still in the middle of the study, and don't have a completion date yet. I don't think we should announce anything until we have a better time frame for it

Thanks

Thuy

Will we have test results from using the oily method as well? With empty containers or Anvil?

I think we need to figure out the sequencing and timing of these items then plan around that. I seems these are the items we have to announce possibly but please correct:

1. MD results
2. Oily matrix method
3. New testing of empty marketplace containers? With or without oily matric method?

One suggestion when we post the method – Ask States and Regions labs who have the capability to contact ACB for a multi-lab validation of this method.

Thuy

Duh, hadn't seen this! Yes, Oily method WILL be posted; it's currently with the OPP IO for review. I think the comms plan should simply be:

- OPP update
- Calls to states & regions

- Notify CLA
- Notify PEER

Anything else?

Many thanks Kimberly. That is great. I'll also follow-up with Cheryl and Beth as I think there was a different impression.

What is the oily matrix method plan? Will that be for posting? We'll need a comms plan if it is public and pair or explain how that fits with additional testing results of empty containers.

Verbal exchange only at this time. Not transmitting any paper.

Importance: High

Hi Kimberly,

We wanted to follow-up on the PFAS meeting yesterday. Can you please clarify if MD will receive the test results? Or is the call next week a informal, verbal only exchange of the results which our sense from the OPP General yesterday with Michal.

We are trying to gauge with Cheryl how prepared we need to be with comms and to coordinate with Beth and the regions.

Thank you,

Shamus Ozmen
